RVPF Core Capability Model	author: olaf.erler@hshl.de	V0.1 15-07-26
Core Capability	Description	Example
Capture	Collects information from the physical Or virtual world	Camera, Microphone, Motion Capture, Depth Sensor
Emit	Outputs energy or information Into the physical or virtual world.	Lighting, Speakers, LED Wall, Display
Track	Continuously provides positions, Orientations, or states	Vive Mars, OptiTrack, XR-Tracker, Vicon
Interact	Enables interaction between the user, The system, and StudioObjects	Midi, Streamdeck, Gamepad, Touch
Communicate	Exchange data With other StudioObjects Or external systems	OSC, DMX, TCP/IP, Midi, Serial
Synchronize	Synchronizes time, processes, or states	Genlock, Timecode, Sync
Configure	Manages configuration and parameterization	Device Setup, DMX-Adress, Calibration
Monitor	Monitors and reports the system's status	Temperature, Online Status, Errors, Latency
Simulate	Creates or alters virtual states Without a direct physical counterpart	Niagara Systems, MetaSounds, physics simulation, AI agents, behavioral simulation, Virtual sensors, digital twins
